BENEFITS THAT MAKE IPC POOLS UNIQUE

Integrated skimmer

The skimmer is built-in the FRP shell, preventing filtration risks and guaranteeing high durability

Low line

fine molding under the athermic edge that smoothly integrates it to the pool, prevents scuffing and has a perfect finish

Water Plus

Equipped with 8 water jets grouped in threes to allow a highly effective hydromassage and maximum relaxation. Additionally, the water is purified and oxygenated

Low surface

Moldings built-in the shell to mount accessories leaving them flush with the pool wall. They prevent scuffing and have a smooth finish

Athermic edge

The interior of the athermic edge has a smooth bullnose that integrates it with the pool, providing a cleaner look

Extra size skimmer

Exclusive 11" wide skimmer designed to provide higher filtration capacity and to be easily cleaned

Electrical control

Exclusive electric panel with circuit breaker, contactor and timer for automatic on and off of the filtration equipment

Athermic tiles ATTENUAR

Anti-slip, heat resistant tiles for the pool surround or deck.

High level

Water surface level 2" from the edge which greatly improves the appearance of the pool
